- 4) The site will be served at <http://localhost:8080/home>

User Guide:

Here are some tips to use our SwoleMates application.

Posting a photo on the newsfeed:

- 1) Once logged in, navigate through the newsfeed by clicking on the home button icon in the top nav bar.
- 2) The user can create their own post by clicking on the 'Upload A Photo' button. User can add images/gifs/videos of the following formats: (.png, .jpg, .bmp, .gif, .gifv, .mp4, .webm).
- 3) The user must also add a description of their progress image they are posting and can choose to privatize their image so only friends can view their specific image.

Posting a photo on the nutrition info page:

- 1) Once logged in, navigate through the navigation bar and click on the nutrition information tab.

- 2) The user can create their own post by clicking on the 'Upload A Photo' button. User can add images/gifs/videos of the following formats: (.png, .jpg, .bmp, .gif, .gifv, .mp4, .webm).
- 3) Users can add a description to the meal image they are posting, as well as nutrition information like calorie count or fat percentage.
- 4) The user can also retrieve nutrition information automatically by clicking on the correct curated label, and in return, an accurate calorie count or serving size will be added to your meal image post.

Interacting with other users:

- 1) Scroll through feed of progress pics and meals
- 2) Write comments
- 3) The user can also like other users posts and comment on their posts as well.
- 4) Click on user profile to view their posts
- 5) Add as friend by clicking Add as Friend button
